SECTION C: Findings of Fact and Conclusions of Law

1. ERC owns and operates the Facility, which is located in Dublin, Virginia. The Facility is an electroplating operation. Operations at the Facility are subject to the Virginia Waste Management Act and the Regulations.
2. ERC is a LQG of hazardous waste. ERC was issued EPA ID No. VAD043344472 for the Facility.
3. At the Facility, ERC generates solid wastes which are also hazardous wastes. Hazardous wastes generated at the Facility include wastes with the following waste codes: D001, D002, F003-F008, D035, as described in 40 CFR § 261.21. These hazardous wastes are accumulated in containers at the Facility after generation.
4. On August 5, 2016, DEQ-BRRO staff inspected the Facility for compliance with the Virginia Waste Management Act and the Regulations. Based on the inspection and follow-up information, the Department made the following observations:

- a. ERC did not submit a Biennial Report for 2015 (due March 1, 2016).

40 CFR § 262.41 requires generators who ship any hazardous waste off-site to a treatment, storage or disposal facility within the United States to submit a biennial report by March 1 of each even numbered year.

- b. ERC failed to specify training requirements in position descriptions for hazardous waste handlers.

40 CFR § 265.16(d) requires the owner or operator to maintain the following documents and records at the facility: (1) The job title for each position at the facility related to hazardous waste management, and the name of the employee filling the job; (2) A written job description for each position listed above; (3) A written description of the type and amount of both introductory and continuing training that will be given to each person filling a position listed above; (4) Records that document that the training or job experience required above has been given to, and completed by, facility personnel.

- c. ERC failed to provide annual refresher training every year.

40 CFR § 265.16(a) requires that facility personnel complete training in hazardous waste management.

40 CFR § 265.16(c) states that facility personnel must take part in an annual review of the initial training required in paragraph (a) of this section.

- d. ERC failed to make a hazardous waste determination for spray booth filters.

40 CFR § 262.11 requires that a person who generates a solid waste, as defined in 40 CFR § 261.2, determine if that waste is a hazardous waste.

- e. ERC failed to keep all hazardous containers closed.

40 CFR § 265.173(a) requires that a container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste.

- f. ERC failed to label two containers of hazardous waste in a 90-day accumulation area with the words "hazardous waste".

40 CFR § 262.34(a)(3) requires generators to mark each hazardous waste container in 90-day accumulation areas with the words "Hazardous Waste".

- g. ERC failed to label one container of hazardous waste in a satellite accumulation area with the words "hazardous waste".

40 CFR § 262.34(c)(1)(ii) requires that generators of hazardous waste mark hazardous waste containers in satellite areas with the words "Hazardous Waste".

- h. A container used for satellite accumulation was not under the control of the operator of the process generating the waste.

40 CFR § 262.34(c)(1) states that a generator may accumulate as much as 55 gallons of hazardous waste in containers at or near any point of generation where wastes initially accumulate, which is under the control of the operator of the process generating the waste, provided that the generator complies with certain other requirements.

- i. ERC failed to keep containers of universal waste closed.

40 CFR § 273.13(d)(1) requires that a generators of universal waste contain any lamp in containers or packages that . . . must remain closed.

- j. ERC did not use a used oil transporter with an EPA ID number to transport its used oil off-site.

40 CFR § 279.24 states that, except as otherwise specified, generators must ensure that their used oil is transported only by transporters who have obtained ERA identification numbers.

- k. ERC failed to make an on-specification determination for its used oil.

40 CFR § 279.11 states that used oil burned for energy recovery is subject to regulation under this part unless it is shown not to exceed specified allowable levels of the constituents and properties.

- l. ERC failed to maintain records of used oil shipments made to individuals who burn the used oil for energy recovery.

40 CFR § 279.74(b) states that a generator who first claims that used oil that is to be burned for energy recovery meets the fuel specifications under §279.11 must keep a record of each shipment of used oil to the facility to which it delivers the used oil.

5. On December 1, 2016, based on the August 5, 2016 inspection and follow-up information, the Department issued NOV No. 16-11-BRRO-005 to ERC for the violations described in Paragraph C(4) above.
6. On March 9, March 13, April 7, and April 28, 2017, ERC submitted written responses to the NOV.
7. On January 19, 2017, DEQ staff and representatives of ERC met to discuss the NOV.
8. Based on the results of the August 5, 2016 inspection, and the documentation submitted by ERC, the Board concludes that ERC has violated 40 CFR § 262.41(a), 40 CFR § 265.16(d)(3), 40 CFR § 265.16(c), 40 CFR § 262.11, 40 CFR § 265.173(a), 40 CFR § 262.34(a)(3), 40 CFR § 262.34(c)(1)(ii), 40 CFR § 273.13(d)(1), 40 CFR §279.11 and 40 CFR § 279.74(b) as described in paragraph C(4), above.
9. ERC has submitted documentation that verifies that the violations described in Paragraphs C(4)(a), C(4)(c) through C(4)(h), C(4)(j) through C(4)(l) above, have been corrected.
